Image Management

Background

The application is a network based solution that solves issues of managing images that the client has purchased

	Custom Development
	PHP
	Database
	CSS
	HTML
	JavaScript

The Challenge

The client has a number of images that they have purchased and they keep on getting new images regularly. As they have huge amount of images (over 50000), it was not possible to manage those and they end up spending more for the same images that they may already have

The Solution

NRS designed a solution that was easy to use, and solved all of their issues with the image management.

Major Features

- Track usage of the images
- Association with the client campaign
- Usage per user

Some other Features

- Improve accuracy in filing and retrieval of Artworks.
- Provide ability to generate accurate results
- Ability to provide secured anytime browser based access to the central server from any terminal
- Central file server
- Thumbnail Preview
- Ability to Save images in different formats
- Integration with the Reference Numbers
- Customizable Categories
